# KEY 2016 CONSTRUCTION INFORMATION

## 1. The Point Project: I-15; S.R. 92 to 12300 South (MP 283-291)

**Overview:** Crews are widening I-15 to six lanes in each direction from S.R. 92 in Lehi to 12300 South in Draper. In addition, the road is being reconstructed with new concrete pavement, upgraded lighting, traffic management systems, and overhead signs are being installed. Traffic is shifted through the construction zone, and lane restrictions are scheduled during nights and weekends.

**Timeline:** February 2015 through fall 2016

## 2. U.S. 6; Barrier Upgrades in Spanish Fork Canyon (MP 184-187 and MP 192)

**Overview:** UDOT is replacing existing barrier and installing new barrier from Diamond Fork to the U.S. 89 junction and near MP 192 in Spanish Fork Canyon to enhance safety for drivers. The highway is reduced to a one-lane road with a traffic signal from Sunday at 9 p.m. to Friday at 9 a.m. All lanes are open on weekends from Friday morning to Sunday night.

**Timeline:** April through August 2016

## 3. Provo 300 South (U.S. 89); 700 East to 200 West (MP 333-334)

**Overview:** This project involves reconstructing 300 South from 700 East to 200 West in Provo with new concrete pavement. Crews will also complete several utility upgrades in the area. The new road will feature a raised median, bike lanes, a new traffic signal at 400 East, and a multi-use path on the north side of the street. The south side of 300 South is closed, and the road has been reduced to one lane in each direction. Short-term side street closures are scheduled throughout the project.

**Timeline:** April through November 2016

## 4. Spanish Fork Main Street (S.R. 156); 300 South to I-15 (MP 0-2)

**Overview:** Crews are removing and replacing 1.5 inches of asphalt on Spanish Fork Main Street. This project is adjacent to the microsurfacing project on Main Street from 300 South to Arrowhead Trail Road. Lane reductions will be in place, and access to side streets will be limited during construction. Drivers should expect delays and detours.

**Timeline:** May through July 2016

## 5. U.S. 6; Juab/Millard Co. Line to MP 115 (MP 107-115)

**Overview:** UDOT is placing a new layer of asphalt and a chip seal along an eight-mile length of U.S. 6 near the Little Sahara National Recreation Area. Lane reductions will be in place, and drivers should expect delays as construction is completed.

**Timeline:** June through July 2016

## 6. Spanish Fork Microsurfacing at Three Locations

**Overview:** This project includes applying a layer of microsurfacing on three state highways in the Spanish Fork area: U.S. 6, from the I-15 interchange to the U.S. 89 junction; S.R. 198 from Arrowhead Trail Road to 300 South; and a five-mile segment of S.R. 77 in Lakeshore. Lane reductions will be in place, and drivers should expect delays as construction is completed.

**Timeline:** June through July 2016

## 7. Spanish Fork 400 North (S.R. 147) to Mapleton (MP 11-17)

**Overview:** UDOT will remove and replace four inches of asphalt on S.R. 147 from Mapleton to I-15 in Spanish Fork. The road will be reduced to one lane with flagging operations to guide drivers through the work zone. This work will take place during daytime hours and drivers should expect delays.

**Timeline:** June through August 2016

## 8. Nephi Main Street (S.R. 28) (MP 39-43)

**Overview:** This project will include repaving and completing drainage improvements on Main Street in Nephi. It will also add aesthetic enhancements on Main Street from 200 South to 200 North. Lane reductions will be in place, and drivers should expect delays as construction is completed.

**Timeline:** July through September 2016

## 9. U.S. 6 Bridge Deck Maintenance – two locations near Spanish Fork Canyon (MP 177 and MP 202)

**Overview:** UDOT will repair potholes and other pavement deficiencies on bridge decks at the mouth of Spanish Fork Canyon and near Tie Fork. One lane in each direction will be maintained, and work will take place during daytime hours.

**Timeline:** July through August 2016

## 10. Springville 400 South (S.R. 77); Main Street to 400 East (MP 9-9.5)

**Overview:** This project includes widening 400 South (S.R. 77) between Main Street and 400 East to add an additional lane in each direction. It will also widen 400 South at the intersection with Main Street to add a right turn lane from eastbound 400 South to southbound Main Street. Lane reductions will be in place, and drivers should expect delays as construction is completed.

**Timeline:** August through September 2016

## 11. Provo Orem Transportation Improvement Project (TRIP)

**Overview:** The roadway components of this project include widening University Parkway to three lanes in each direction, improving various intersections, and replacing the University Parkway bridge over the Provo River. For more information, visit <http://www.rideuta.com/UTAProjects/Provo-Orem-Transportation-Improvement-Project>.

**Timeline:** 2016 through 2018
